

## Multimedia show on the 75th National Day in Turkey

LOBO has done the official celebration for the 75th birthday of Turkey in front of the houses of parliament in Ankara.

Laser, water, fireworks, video and live-performance have been the building block of the show.

Directly in front of the building of the Turkish Parliament - over the roofs of Ankara - a spectacular multimedia event about the history of Turkey took place on April 23 and 24, 1995. Between 60.000 and 80.000 spectators - among them were approximately two hundred heads of state or government sitting on the VIP Lounge - were present at this great event. As crowds of people were expected a big contingent of security forces were present, too. The main streets were cordoned.

Set-up of a Laser Truck.

At this High-Tech event the most modern laser technology of LOBO electronic, Germany and its Turkish trader Ajans ADS, specialist in fireworks, were used. The enthusiastic spectators could enjoy high-performance Laser systems, water screens, fireworks and a sophisticated soundtrack in Turkish. The multimedia show was partly accompanied by black-and-white authentic historical documents which were inserted by video.

The central Water Screen.

The laser truck of LOBO, the biggest mobile laser system in the world, was stationed in vicinity of the building of the Turkish Parliament. The

An whole army of security foreces was necessary to protect the 80.000 visitors and over 200 international government representants.

show was projected onto the water screen (approximately 15 m x 25 m) in the water basin in front of the building of the Turkish Parliament. Video projections on gauze screens (6 x 8 m) were presented on the left and right side of the basin. Additionally, there were projections with two projectors onto the building of the Turkish Parliament which is approximately 35 m high. These projectors were supplied by a fiber optics cable (150 m).

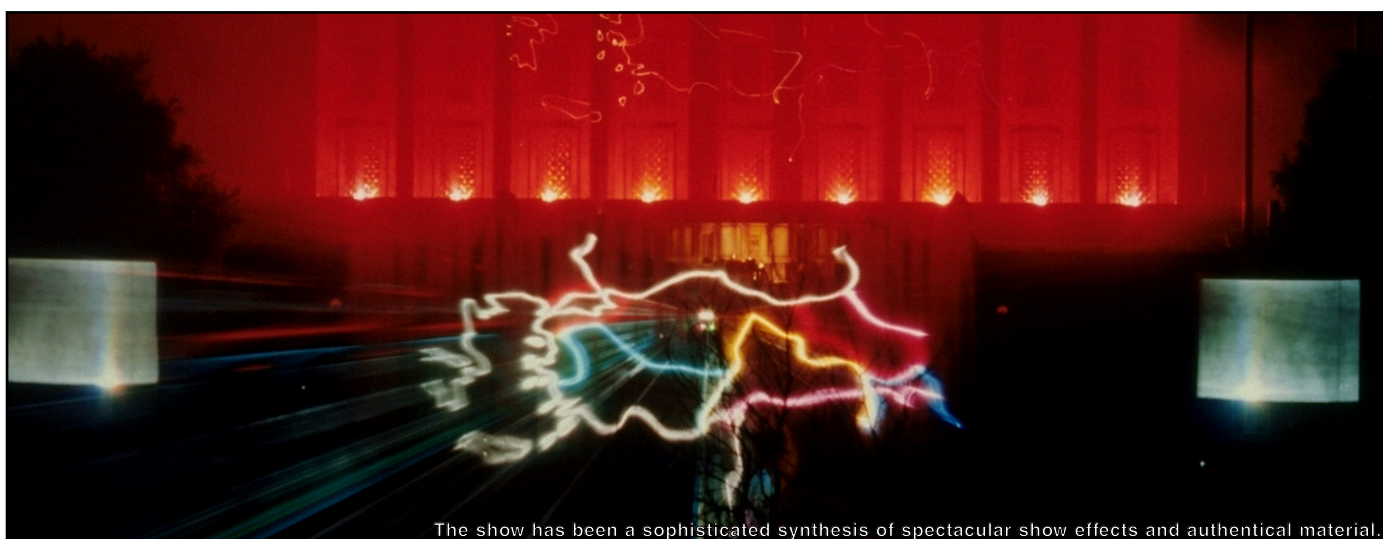

Particularly impressive in this completely synchronized multimedia show was the combination of different laser projections, the great fireworks with calibers of up to 40 cm and the fascinating pyrotechnic effects as well as the soundtrack with its audio performance of 45.000 W. The super-show which lasted about 30 minutes was produced by Mr. Peter Müller Krejcir, the Art-Director of LOBO electronic, in the studios in Aalen. Mrs Idil Tuncali,

Art Director of Ajans ADS, who knows the peculiarities of Turkey very well, contributed to a high degree to the great success of the production, too.

The multimedia event was a great success because of the synthesis of sophisticated laser technology, attractive show effects, authentic documents and folkloric performances.

The dimensions of the show were mindblasting.

The show has been a sophisticated synthesis of spectacular show effects and authentional material.
