In 2017 again ILDA Awards for LOBO

No other German Company at the ILDA Conference 2017 received more Awards than LOBO did

With the awarded creative performance in the category "beam show" and "laser photography", in Bratislava this week, LOBO is leading the all-time ranking of the total sum of ILDA awards of all laser show suppliers worldwide further on.

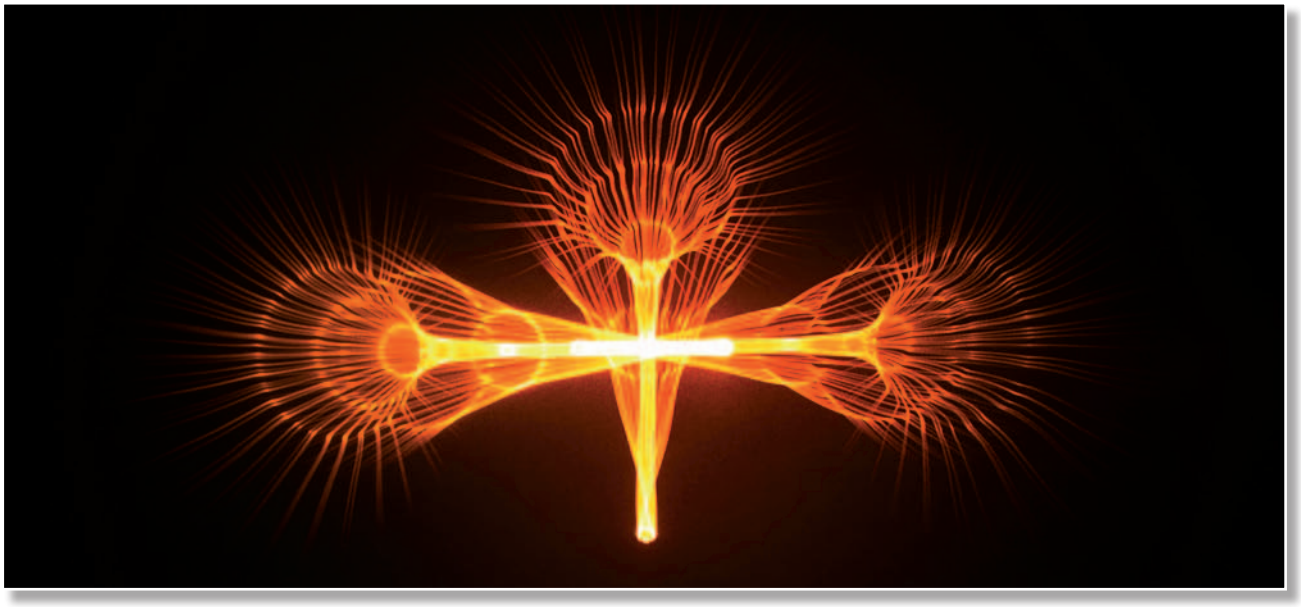

Against a competition of 181 award entries LOBO did successfully prevail. In the important category for laser shows called „Beams/Atmospherics Show for a Single X-Y Scanner Pair" LOBO won the first place with the show „J.A.B.S", programmed by show designer Philipp Wendt. Through his extremely high level of precision the impression is created that not lasers are interpreting the music but playing the music themselves. You see what you hear in a perfect fusion of synchrony.

In the category „Beams/Atmospherics Show for Multiple Scanner Projectors" LOBO was prized with an excellent third place for the show "The Mamba" by show designer Roman Schütz. In this show, which is based on a remix by Nancy Sinatra's world-famous song „Bang Bang", ten laser projectors created an impressive spectacle between the lighting choreography and Nancy's vocals.

An additional award, the second place, LOBO received in the category „Laser Photography" with the photo titled „Trinity", a laser light sculpture created and photographed by LOBO's Creative Director Udo Gauss.

Note: All laser effects are genuinely depicted.
